

GUIDELINE FOR POSTER PRESENTATION

Poster session is a good medium for authors to present papers and meet with interested attendants for in-depth technical discussions. A poster should be as self-explanatory as possible to allow the attendants to proceed on their own while the authors are unavailable to discuss the particular points of interest. Therefore, it is important that the authors have to display clear and noticeable message to attract people who might have an interest in your work.

Poster Preparation and Display

A partition board for poster presentation provided is approximately 90 cm (height) by 95 cm (width). Please ensure that your poster does not exceed this size. It is recommended that you leave a margin of at least 3 cm around the poster. The poster must be in English and should be legible from a distance of 2 m and exhibit clear headings and sub-headings. The presentation must cover the material as cited in the abstract. Please see the general recommendation about poster preparation below:

General recommendation:

- 3 cm for the paper's title
- 1.5 cm for the names/addresses of the authors
- 1.5 cm for section headings such as introduction, results, legends for figures, tables
- 0.8 cm characters in height for other texts
- Use colors, graphical forms, figures, etc. to improve clarity

Mounting

The poster sessions are located on 2nd floor at Bangkok International Trade & Exhibition Centre (BITEC). It is the authors' responsibility to set-up and removes the poster. Each poster has been assigned a code and must be mounted on the assigned board.

To locate your board, look for the board marked with your poster code. Your poster code is displayed in conference program (presentation list) in the conference's website.

[The correct fixing material is double-sided glue special tape, which will be provided in the conference.](#)
